Task:

Write a program that will enable entry of serial number, last name and first name for 3 students, and the number of justified and unjustified hours. Write the serial number, first and last name, and number justified and unjustified hours for each student. Calculate and print the total number justified and unjustified hours (for all students), and the name and surname of the student with the smallest the number of unexcused hours and the name and surname of the student with the highest number of excused hours. Use functions. Try creating an array of student objects.
